

**MONTEREY HARBOR
OPERATIONS AND MAINTENANCE**

PROJECT LOCATION AND DESCRIPTION: The project is located in Monterey Harbor, California, approximately 100 miles south of San Francisco. This project consists of a 1,700-foot long west breakwater and an eight-foot deep basin near Municipal Wharf No. 1 (Fisherman's Wharf). The City of Monterey is the sponsor.

TOTAL FUNDING:

TOTAL COST:	\$ N/A
FEDERAL COST:	\$ N/A
NON-FEDERAL COST:	\$ N/A
TOTAL FEDERAL COST THROUGH FY 2007:	\$ N/A
FY 2008 BUDGET:	\$ 0
COST TO COMPLETE:	\$ N/A

FY 07 AND 08 ACCOMPLISHMENTS: Funds permitting, periodic inspections will be conducted to monitor structural conditions.

ISSUES AND OTHER INFORMATION: The west breakwater was constructed in 1934. Following years of gradual settlement, the breakwater crest was restored to its original design elevation in FY93. This effort provided improved benefits to the original project; reducing harbor facility maintenance, vessel damage and navigation delays. The Corps dredged the basin near Wharf No. 1 periodically between 1947 and 1957. Since 1957, the City has removed insignificant quantities of material without any request for Federal assistance.

CONGRESSIONAL INTEREST: 17th District, Rep. Sam Farr

POINT OF CONTACT: Deputy District Engineer for Civil Works, Arijs Rakstins, 415-503-6720
